

HYDROSILA
HYDRAULICS YOU CAN TRUST

Custom gear pumps for
low pressure applications

GP2M-series

General information

GP2M-series group 2 gear pumps are simple, reliable and cost-effective solution for low pressure hydraulic systems of mobile machines and equipment. Long experience of the "HYDROSILA" company allows us to create pumps with high reliability and durability. GP2M-series pumps maintain high efficiency throughout their entire service life.

Features:

- External gear pumps.
- Lightweight aluminum alloy body (30% lighter than standart design).
- Mounting flanges and shafts according to SAE, DIN, EUROPEAN, standards or any customized design.
- High quality NBR seals (Viton available).
- Customized solutions for special applications on request.

Technical specifications

Size	Group 2
Displacement, ccm	6...16
Max. continuous pressure, bar	160
Max. intermittent pressure, bar	210
Max. speed, up to min ⁻¹	3000
