your hydraulics

BEST PRICE

HYDRAULICS YOU CAN TRUST

FEATURES

A long-term experience and modern technologies of the HYDROSILA company allows us to create pumps with high reliability and durability.

The pump body design ensures **compact dimensions and low weight** without compromising on strength. We used a **time-proven gearing unit** design. Its reliability has been confirmed by hundreds of thousands of pumps supplied to OEM manufacturers all over the world.

PROFIT-series gear pumps maintain high efficiency throughout their entire service life.

General information

Profit-series group 1 gear pumps are a specially designed solution for hydraulic power packs.

- Mounting dimensions for power packs.
- Ports in mounting flange and rear cover.
- Compact design and low weight.

Profit-series group 2 gear pumps are a simple, reliable and cost-effective solution for hydraulic systems of mobile machines and equipment.

- Mounting dimensions according to DIN, SAE, EUROPEAN standards.
- High quality NBR seals.
- Multiple pumps are available.

Technical specifications

Size	Group 1	Group 2
Pump name	GP1P	GP2P
Displacement, ccm	1,0...5,8	4...28
Max. continuous pressure, up to, bar	220	230
Max. intermittent pressure, up to, bar	240	250
Max. speed, up to, min ⁻¹	4000	4000
